

## Water/Sewer Abatement Policy/Procedure

It is the policy of the Town of Exeter not to grant adjustments to water & sewer bills unless the problem rests with the Town's system. However, the Town recognizes that a high bill resulting from accidental, unpreventable water release can present financial hardship to a customer. While most water releases are preventable, there are certain circumstances when an accidental water release cannot be reasonably prevented. The intent of this policy is to establish a one-time abatement, during any ten-year period, for up to half of the excess water consumption above normal consumption, due to an accidental, unpreventable water release.

### Policy/Procedure:

1. All customer requests to abate any portion of a metered water bill that is unusually high due to unpreventable leakage shall be reviewed by Town staff on a case-by-case basis. In order to qualify for abatement, a customer's excess consumption must exceed the greater of 100% or 35,000 gallons above their normal average consumption. The customer must also prove that the deficiency responsible for leakage has been repaired or corrected. This policy only applies to leaks that have occurred within the previous six (6) months of the date of the abatement request.
2. In the event that a customer cannot determine the source or cause of the abnormally high consumption, the customer is required to hire a private licensed plumber to assist the customer in trying to determine said source or cause. If the plumber is unable to determine the source or cause of the abnormally high consumption, the Town can only speculate that the customer has located and repaired or corrected said source. If the customer claims that said source never existed, the Town shall test the meter and make an adjustment to the bill in accordance with NHPUC requirements for meters found to be over-recording. If the meter test reveals an accurate or under-recording meter, the customer shall be held responsible for the entire bill plus the cost of meter testing and shipping/handling.
3. In the event the source or cause of the abnormally high consumption is related to a leak due to customer negligence such as the failure to maintain internal (private) plumbing fixtures in good repair and/or protect plumbing from freezing, the customer shall be held responsible for the entire bill.
4. In the event the abnormally high consumption has occurred due to "unpredictable leakage" not caused by customer negligence, ignorance or unfortunate circumstances, as determined by Town staff and the Water & Sewer Advisory Committee, the Town shall consider granting a one-time abatement, per account, during any ten-year period, up to half of the water consumption above normal consumption. The abatement calculation may consider compensation from any other sources, including insurance policy claims, etc. Normal consumption will be the average of at least the previous three years' consumption history, for similar billing periods, unless deemed otherwise by the Town staff or Committee. The Town staff and Committee reserve the right to grant adjustments on water use or sewer use or both.
5. The customer may be required to submit a written statement from their homeowner's insurance provider

stating what portion, if any, of the leak is covered by insurance.

6. The Town shall not disconnect service (for abnormally high consumption) provided the customer pays the entire amount due within the normal payment period or enters into payment arrangements for the excessive amount and is in good standing on all current billings.

7. Landlords will be responsible for tenant bills in accordance with this policy. Failure by a tenant to pay water and sewer charges will not excuse the landlord of any outstanding obligations.

### Procedures:

The following example shows how the abatement is calculated based on rates in effect on 1/1/08:

	Consumption	Dollar Amount
Total Usage	75,000 gal	\$405.75
3 year average	30,000 gal	\$162.30
Excess above average	45,000 gal	\$243.45
Half of excess abated	(22,500 gal)	(\$121.72)
Remaining excess Customer responsibility	22,500 gal	\$121.72
3 year average	30,000 gal	\$162.30
Total remaining bill due		\$284.02

### Severability:

To the extent this policy is in conflict with State law, State law will prevail.
